

```
import java.util.Scanner;
public class task1 {
    public static void main(String[]args) {
        int[]numbers = {10,20,30,40,50};
        Scanner scanner = new Scanner(System.in);
        System.out.print("enter an index(0 to 4):");
        int userIndex = scanner.nextInt();
        if(userIndex >= 0 && userIndex < numbers.length) {
            System.out.println("Element at index" + userIndex +"is:" + numbers[userIndex]);
        }else {
            System.out.println("Error: Invalid index!");
        }
        scanner.close();
    }
}
```
